

RURIS 701KS tiller

Engine	General Engine
Engine type	4 stroke
Engine power	7 HP
Engine displacement	208 cc
Ignition system	Electronic
Emergency stop lever	Standard equipment
Start-up	Manual
Lighting system	Not equipped
Shifter	Classic
Transmission	Pulley-belt, gears
Transmission case	Ductile iron
Cables operation	Mechanical
Gear shifting	2 forward + 1 reverse
Tilling width	560-830 mm
Tilling depth	Max 290 mm
Fuel	Unleaded fuel
Fuel tank capacity	3,6l
Average fuel consumption	1 l/h
Engine oil capacity	0.6l
Transmission oil capacity	1.5l
Accesories	Full series + mowing system
Weight	85 kg
Average worked area	600-1000 mp/h
Product warranty	24 months

Ruris 701KS professional tiller is designed for working in gardens and field crops with dimensions over 3000 m.

Advantages

The transmission case is of ductile iron, shock resistant and mechanical wear.

Unlike a classical tiller, Ruris 701KS tiller can be accessorized with reversible plough, due to the ruggedness of the gearbox.

The possibility of accessorizing the tiller with a mower for grass, having a 3-channel pulley for the option of the mower.

The innovative Ruris design for the protection case of the engine is distinguished within the category of tillers.

The transmission from the engine to the gearbox is made by two belts with tensioner.

Benefits

The transmission case requires no special maintenance and it can be used on all groups of soils.

Allows the use of a professional plough at a depth of 20 cm - for autumn tillage or other types of furrows.

It is characterized by ruggedness and innovative exterior design.

Very simple maintenance of the belts.
