

Porous textile hose **RURIS 1215PC**

The porous textile hose that includes **RURIS 1215PC** connectors is the ideal solution for efficient and economical irrigation of your garden. Made of high-quality materials such as Oxford cloth, PVC, PP and ABS – this hose ensures excellent durability and superior wear resistance.

Thanks to the 210D outer fabric, the product offers increased protection against external factors and maintains optimal performance under various conditions of use.

Features:

- Length: 15 m
- Design poros
- Pressure 4 bar
- Working temperature between 5°C and 35°C
- Debit 9–10 L/min

With a length of 15 meters and a size of 1/2", the hose is easy to handle and suitable for medium to small gardens.

The flat, porous design allows for even water distribution directly to the plant root, reducing evaporation and unnecessary waste. Thus, the user can save up to 80% of water compared to conventional watering methods, while also helping to protect the environment.

With a flow rate of 9–10 L/min and a working pressure of 4 bar, the **RURIS 1215PC** hose provides a steady and efficient flow, ideal for even irrigation. The working temperature range between 5°C and 35°C makes it suitable for use throughout the gardening season.

In addition, the hose is equipped with practical 1/2" connectors, including a water shut-off connector, which facilitates quick mounting and precise flow control.

With a light weight of only 0.708 kg, the **RURIS 1215PC** is easy to store and handle, providing a comfortable, efficient and environmentally friendly watering experience.
